

1 REMARKS

2 The remarks will follow in the order set forth in the office action from page 2 onward.  
3 The specification has been amended such that there is consistency as to character designator 16.  
4 The same is true for designator 32 since the back panel is an impact absorbing layer. Therefore  
5 no drawing changes are needed as pertaining to these numbers. Nor is a change needed as to the  
6 comment dealing with number 18 as a specification change has dealt with that also.

7 Figures 9 and 7 have been corrected in the manner recited in the Examiner's advice.

8 As to number 91, the specification has now been amended without the addition of new  
9 matter to call its purpose.

10 The changes of frame 17 to framework 17 and bores 60 to apertures 65 have been carried  
11 out.

12 The brand "Velcro®" has been amplified in the summary and deleted in claim 2.  
13 Throughbores has been changed to "through bores" at both pages 10 line 12 and at page 11 line  
14 4 for claim 9.

15 The lack of proper antecedent in claim 4 has been handled by an amendment to claim 1.

16 In claim 11 "peg's head" is now "head of the peg".

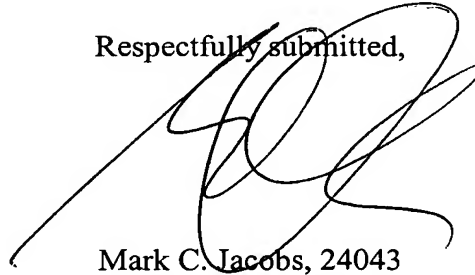

17 Claim 2 has been amended to overcome the indefiniteness.

18 It is noted that claims 1,3-12 have been allowed. Claim 2 is now believed to be allowable  
19 as well.

20 Early passage to issue is now sought in view of this amendment document.

21 If any minor issues unforeseen by counsel still remain, the Examiner is requested to  
22 handle them by an Examiner's amendment or to contact counsel in California at 916-485-  
23 5000 to resolve them.

24  
25 Respectfully submitted,

26  
27  
28  
29

DRAWING AMENDMENT

The Examiner is correct as to the objections to Figures 7 and 9.  
Replacement drawing pages are enclosed.
